

ASSEMBLY INSTRUCTIONS FOR ZENPORT'S FACESHIELD (FS825)

1. Turn the 5 black attachments on the orange cap sideway so they're parallel to fit the 5 cutouts on the faceshield.
2. For front protection, start from the middle and turn the middle black attachment (#14) downward to keep the shield in place. Do the same for the #21 and #36.
3. For side or angle protection, start from the far left or far right, depend on where you want the protection (#23 or #27).
